Photoshop CS6 Features: 60+ editing tools, powerful new Lens Correction tools, upgraded from Photoshop Lightroom Classic CC, new features for Photomerge, a redesigned Camera Raw panel, and much more, check out the full list of new features [HERE](#). Over the years I have had both versions of Photoshop and I found a lot of truth in the marketing hype when it said Photoshop is the best, but I am not 100% sure anymore. I would love to have two versions installed on my computer again to compare for myself. I am very happy with Photoshop Elements and would highly recommend it to everyone, it is the best bang for the buck. I personally use Photoshop Elements for most of my editing and Photoshop for when I need to do a job like touch up old art or touch up some stock photos. I have downloaded Photoshop Elements numerous times since the first version was released in 2001. Each time I find out some of my favorite new features, most of the time I am also missing other more useful features. If you are looking for the best bang for your buck, you are more than welcome to download Photoshop Elements. What are the differences between Photoshop and Photoshop Elements? The Paths tool creates shapes from freehand drawing or from vector shapes that can be used to create a desired effect. These shapes can be edited and manipulated. The Gradient tool allows you to paint the background of the image with a gradient. They can be created using multiple colors, or using multiple gradient stops, that control how the color appears in the transition. The Liquify tool is most commonly used for smoothing, warping and distorting an image. It can create a 3D look, or create cool effects that can be applied to a photo or vector image. The Pen tool is a good option when you want to edit vector objects, including lines and shapes. You can trace an object from a photograph, or from vector artwork, and create, modify, transform, and resize shapes in Photoshop. The Pen tool can create lines, curves, and shapes from scratch, but you can also trace a design or path from another image. You can then modify the line, or duplicate and/or move it around to create your design. The Graphic Pen tool creates shapes using the same path data as the Pen tool, but treats the object as a graphic that you can manipulate independently from the path data. The color and shape options can be modified as you create your design. The Eraser tool can be used to remove objects from a picture, or parts of objects, like eyes or mouths. It can also be used to create new objects from scratch, or to flatten a layer to a new image. The Eraser Tool can be used to create the same sort of effects as the Eraser brush from previous versions of Photoshop. It is good for removing paint, for example, or drawing off an unwanted object from a photograph. The Zoom tool is good for enlarging or reducing images. It can be used to examine an object or image more closely, for example to reveal problems that weren't detected during the original photo shoot. The Hand tool is best for creating a new artwork. You can draw directly in the image using the graphics tablet or stylus, and then choose from a variety of options in the Tool Options window. The Crop Tool is useful for selecting just the portion of an image that you want to include in a new image. You can use the Crop tool to select and delete objects from the background of a photo, or create an entirely new image from the same area. It's also good for repositioning objects in the

As the Commonwealth concedes, the district court did not have the authority to revoke Appellant's term of supervised probation, and thus the court did not abuse its discretion by concluding that Appellant violated his conditions of supervised probation. The district court did not abuse its discretion in finding that there was a substantial violation and that revocation of Appellant's supervised probation was necessary to vindicate the court's authority. Accordingly, we affirm the order of the district court. We dispense with oral argument because the facts and legal contentions are adequately presented in the materials before the court and argument would not aid the decisional process. AFFIRMED 4
